

# Setup Fax Client with Print Support

1. Download the Fax Client setup utility: [Download Here](#)
2. Run the setup program in the downloaded zip archive: FaxClientSetup.exe

3. After completion there will be a shortcut on your desktop called "FaxClient"
4. There will be a printer installed in your system called "FaxClient". This printer can be used from any document like Microsoft Word.
5. Example: Open a text document from standard utility like Notepad. Type some text into the screen and print the output to the "FaxClient" printer. This will trigger the FaxClient Utility to launch to finish up the information needed for the fax. Things like the fax number and options to add additional documents. On the first launch you will be prompted for the "Service Provider". This should be the same name you use to log into the FaxAgent Web

The use of this system is restricted to authorized users. All information and communications provided by this system is subject to review, monitoring and recording at any time, without notice or permission. Unauthorized access or use shall be subject to prosecution. If you are using this system on behalf of a business, that business accepts these terms. It will hold harmless and indemnify the service provider hosting this system along with its affiliates, officers, agents, and employees from any claim, suit or action arising from or related to the use of the system or violation of these terms, including any liability or expense arising from claims, losses, damages, suits, judgments, litigation costs and attorney fees.

By your use of this system, you agree and acknowledge that the service provider hosting the system is not liable for content, lost content, damage to programs, operating systems or hardware and you waive any claim you may have in law or equity against the service provider hosting the system as a result of direct, indirect or consequential harm, damage, cost, expenses or inconvenience you might incur or experience either personally or through the claims of third parties.

Portal through a browser like Chrome. Then click through the screens to submit the fax.

The screenshot displays the FAXAGENT web interface. At the top, there is a navigation bar with the following menu items: DASHBOARD, SEARCH, VIEW, SEND (highlighted in green), SETTINGS, ADMIN, and LOGOUT. Below this is a progress bar with five steps: 1: RECIPIENT INFO (active), 2: ATTACHMENTS, 3: PREVIEW FAX, 4: SEND FAX, and 5: CONFIRMATION. The main content area is titled 'COVER PAGE INFO' and includes a 'RESET' button and a 'NEXT' button with a right-pointing arrow. The form contains several input fields: 'Fax Number' with a dropdown for '+ 1' and a text box containing '8005551212'; 'Deliver To' (empty); 'Sent From' with 'ADMIN'; 'Fax Subject' (empty); 'Cover Page' with a dropdown menu showing 'CoverPage'; 'Schedule' with a dropdown menu showing 'send immediately'; 'Tracking Key' (empty); and 'Charge Code' (empty). A 'Notes' section contains a text area with the text 'TEST COVER PAGE FOR EXAMPLE FAX TRANSMISSION'. On the right side, there is a small thumbnail image of a document.

6. In addition to faxing documents, the FaxClient can be used like a stand alone utility to check settings, search for faxes, download archived faxes other operations.
